## Putting New Life In Your Restroom Facilities

### Partitions

**FLOOR-MOUNTED, OVERHEAD-BRACED**  
Strongest and most economical installability.

**FLOOR-TO-CEILING MOUNTED**  
Ideal for situations where two drains are not desired. Requires structural elements at the plumb to ceiling connectors. Maximum ceiling height 10 feet.

**CEILING-HINGE**  
Ideal where there are no drains to support. Requires structural elements at the plumb to ceiling connectors. Maximum ceiling height 10 feet.

*"Exceeding your expectations is more than our job... it's our pleasure!"*

### Why Solid Plastic?

Solid HDPE restroom partitions outperform phenolic, laminates and metal products in almost every measure of durability and economy. Resistant to mildew and odor, our plastic materials will not rust, break or delaminate. These graffiti resistant partitions virtually maintain themselves — and require no painting.

### Low Life-Cycle Cost

**Low Life-Cycle Cost** Consider the fact that restroom partitions are subjected to repeated use, even abuse, and you'll realize that the initial cost is only a part of the big picture. Long-term durability of solid plastic partitions and attachments, as well as minimal maintenance costs, add up to significant savings over the life of the product in your facility. In fact, the U.S. Department of Defense specifies HDPE as "the most cost-effective choice when considered over the useful life of the building ..."

**Recycled Materials** When you choose plastic partitions, you are investing not only in the future of your facility, but also in the future of the environment. By designing and manufacturing plastic partitions for long-term use, it is helping to reduce the amount of waste deposited in public landfills.

### URINAL/SIGHT SCREENS

The same durable plastic and hardware as our partitions. Fabricated to precise specifications to offer unlimited design potential.

### SHOWER CUBICLES

Available in standard sizes with heavy-duty terrazzo floor bases. Dressing stalls are also available

### Expert Installation

The MHS installation team ensures that your project will be completed safely and as quickly as possible. MHS can provide quick turn-around for your labor quoting needs. Contact Todd Weaver at (318) 426-2069 or E-Mail your request to [info@mhspros.com](mailto:info@mhspros.com)
